

SLOTTED VANE

AA series full cone nozzles are made of body and slotted vane, for an even spray distribution. Their design allows them to be 35% shorter than other full cone nozzles. They are used in operating environments with a restricted space available and are cost-effective for the lower material quantity.

Typical applications

Washing: exhaust scrubbers washing, vehicle parts and gravel washing

Cooling: high-temperature cooling, vehicle parts cooling, tank cooling

Other applications: spray of chemicals, sea water desalinization

■ Thread size: BSP, NPT (optional)

Spray section

Convex distribution

Slotted disc vane

AA nozzles design is ideally suited for plastic materials.

Slotted vane, so called for its spray section with 6 flows slots on its edge portion and one in the centre.

These vanes produce high-speed rotation of pressurized liquids that flow into turbulence chambers where they are atomized. Slotted vanes provide an excellent atomization in a short time. Effective for cost-saving and in case of limited space.

HOW TO MAKE UP THE NOZZLE CODE

EX.: AAU 2305 B3

• B31 - AISI 316L Stainless steel

• D1 - PVC

• T1 - BRASS

○ B1 - AISI 303 Stainless steel (optional)

○ D2 - PP (optional)

○ E1 - PTFE (optional)
